---

### CAREER SUMMARY:

I code websites that are fluid and responsive across all computing and mobile web browsers. For the past few years, I have combined my love of developing websites with my desire to develop global businesses by working as a remote web developer for organizations in the U.S and Haiti. Currently, I am seeking to expand my work into a full-time or Work Project Front-End Developer.

### EDUCATION:

B.S. Degree, Computer Technology, Université d'Etat d'Haïti (2007)

### TOOLS:

HTML5, CSS3(CSS GRID, FLEX), SASS, JavaScript, Bootstrap, WordPress, Angular.

### SKILLS:

- Writing code for cross-browser desktop and mobile
  - UI testing and user interaction analysis
- Creating code raw code for fluid, dynamic sites
  - Cross-Browsers Development
  - Experience with Git and GitHub
    - Testing and Debugging
    - SEO and metadata
- Familiar with Social Media and third party APIs
- Ability to output clean, commented and friendly code
  - Obsessing for building lightning fast sites

### EXPERIENCE:

Front-End Developer - Victis Management  
Current (Ongoing)

As a Front-End Developer, my job is to convert website design ideas into raw code. My main tools are HTML5, CSS3 and JavaScript. The end result is code that serves as the website's front-end structure. My work includes the basic website design/layout, images, content, buttons, navigation and internal links. I ensure that a website's visual front end is free of errors and looks exactly as designed. I also ensure that a website has the same visibility across different computing and mobile web browsers.

### WordPress –On the Job Solutions

June 2015

On The Job Solutions is a workplace consulting company that provides smart solutions to staffing challenges. Unlike staffing agencies, we are motivated by your success, rather than by databases. As consultants, we are your partners in Finding, Hiring, and Keeping great people for your company.

### Bootstrap, Flexible Design – Mikaben

October 2014 (Contract)

Million Hearts® aims to prevent heart attacks and strokes by: Improving access to effective care, improving quality of care for the ABCS of heart health, focusing clinical attention on the prevention of heart attack and stroke, activating the public to lead a heart-healthy lifestyle, improving the prescription and adherence to appropriate medications for the ABCS. My job was to help the team writing JQuery code for the website.

May 2012 to Nov. 2012 (Contract)

Mikaben (Micheal Benjamin) is a well-known Haitian singer/Song Writer and Producer. My job was to make the website responsive and flexible at any screen size. It was a pleasure for me to be a part of a team who built his website.

### User Experience Design, Maintained – Digicel

2009 (Contract)

Digicel is one of the biggest GSM cell phone company in Haiti, weather for your home or for your business. They provide Wi-Fi hotspots for your mobile device or your laptop, and also provide home phone service. My job was to help them redesign the website and make it user-friendly.

### HTML, CSS. - Electricity D'Haiti (EDH)

2007 (Contract)

EDH is an electrical power company in Haiti that distributes electricity throughout the country. EDH seeks customer satisfaction through other services related to the supply of electricity such as. My job was to help the team write the HTML and the CSS code for the EDH website.
