## Profile

I am a front-end developer who primarily focuses on writing clean, elegant, and efficient code. I code websites that are fluid and responsive across all computers and mobile devises. For the past few years, I have been working as a freelance font-end developer for various business and organizations. Currently, I am seeking to join a dynamic team and expand my skills.

## Work experience

**2007 – 2015**

**Front-end Developer**
Freelance

- In **2007,** my  very first job was for an electrical company in Haiti. My job was to help the team with their HTML and CSS.
- In **2009,** I had the opportunity to work for  a cell phone company in Haiti.  My job was to help them redesign their website and make it more user-friendly.
- In **2012**, I had the pleasure to work in a website for a musician in Haiti. The gig was to the team redesign the website and make it more user-friendly.
- In **2015** I had the chance to built  my very first WordPress website for a client. The job was to built one page website, user-friendly, and mobile friendly.

**2017 – present**

**Front-end Developer**
Victis Management

Victis Management is a four pages government and commercial contracting website. It is built using Bootstrap, HTML5, CSS3 and jQuery. I built this entire website myself using these technologies.

**Front-end Developer**
Template

This is a construction site that I built for practicing purposes. I used git bash terminal in order to use the npm installer to download the latest version of Bootstrap and the Bootstrap-material-design. I used the css-processor Sass to style the website and I used the node Sass compiler to compiled it to the regular css. More in my website.

## Education

**2007**

**Computer Technolohy**
Univercite d'Etat d'Haiti, Haiti
